Mr. Sam Unger Executive Officer
California Regional Water Quality Control Board
320 West 4th Street, Suite 200
Los Angeles, CA 90013

Subject: **Pretreatment Program –Annual Report 2013
(NPDES NO. CA0054097, CI-2022)**

Dear Mr. Unger:

In accordance with the Treatment Plant's NPDES Permit reporting requirements, and all applicable Federal Regulations, attached is the Source Control Program's Annual Status Report (covering the period January 1, 2013, through December 31, 2013, inclusive). This report lists the Categorical and Significant Non-Categorical Industrial Users (Chapter IV) that, during the reported year, were in violation of Federal and/or local pretreatment standards/ requirements.

The following statement applies to report material prepared by the City of Oxnard staff:

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Executed on this 20th day of February 2014, at Oxnard, California.

If you have any questions regarding the contents of this report please call me at (805) 207-1669.

Anthony Emmert
Water Resources Manager

SUMMARY REPORT

TABLE OF CONTENTS

Preface

Chapter I. Summary of Analytical Results

Chapter II. Discussion of Upset, Interference, or Pass-Through

Chapter III. Industrial User List

Chapter IV. Summary of Industrial User Compliance Status

Chapter V. Summary of Pretreatment Program Significant Changes

Chapter VI. Summary of Annual Source Control Program Budget

Chapter VII. Summary of Public Participation Activities

Chapter VIII. Summary of Sludge Disposal Changes

Chapter IX. Summary of Other Program Efforts

PREFACE

CHAPTER I

SUMMARY OF ANALYTICAL RESULTS

This Chapter summarizes the results of analyses conducted on representative samples of the Oxnard Wastewater Treatment Plant's influent, effluent, and sludge. Influent and effluent samples were analyzed daily for biochemical oxygen demand, oil and grease, pH and total suspended solids; and quarterly for priority pollutant metals, phenols, and chlorinated pesticides. Analyses on sludge samples were conducted semiannually for priority pollutants (metals and toxic organics).

Analyses of the Treatment Plant's influent and effluent for conventional and priority pollutants (with the exception of those for oil and grease, cyanides, pH, phenol, and volatile organics, where grab samples were utilized) were conducted on twenty-four (24) hour flow proportional composite samples. The Treatment Plant's effluent samples were collected downstream of the Plant's de-chlorination system. No further de-chlorination procedures were utilized following sample collection. Sludge samples consisted of composites of twenty-four (24) discrete samples collected at one (1) hour intervals.

The analyses for all conventional pollutants, priority pollutants metals and phenols (non-chlorinated) were performed by the Treatment Services Program - Laboratory Services. The samples that were analyzed by contract laboratories were transported via courier. The Technical Services Program - Source Control relies on the Quality Assurance Program of both these laboratories to ensure the validity and reliability of the results. A summary of the Treatment Services Program - Laboratory Services Quality Assurance Program is contained in the Treatment Plant's Annual Self-Monitoring Summary Report.

CHAPTER II

**SUMMARY OF TREATMENT PLANT OPERATIONS
(Upset, Interference, or Pass Through Events)**

The City of Oxnard's Wastewater Treatment Plant did not experience any pass through or interference event from any of the industries in the jurisdiction during this reporting year.

CHAPTER III

INDUSTRIAL USER INVENTORY LIST

The Technical Services Program - Source Control continuously updates its Active Industrial User List. Following is the table containing an updated industrial list of significant industrial users.

City of Oxnard
Significant Industrial Users

CHAPTER IV

SUMMARY OF INDUSTRIAL USER COMPLIANCE STATUS

This Chapter summarizes the inspection, sampling, and enforcement activities conducted by the Technical Services Program - Source Control during 2013. The City of Oxnard's pH limitation of 6.0 has been identified as being more stringent than the Federal limit of 5.0 contained in the General Pretreatment Regulations for New and Existing Sources of Pollution. In addition, as a result of the City of Oxnard's prohibition against the combining of domestic and industrial wastewater prior to the industrial wastewater passing through any required pretreatment device/system and/or sampling well, the City's Total Toxic Organics (TTO) limitation is found to be more stringent than the Federal Categorical TTO limitations.

Following is a spreadsheet summarizing the compliance status of the City's significant industrial users.

Permit Number	Permittee Name	Federal Category	Staff	Treatment Process	CA Samples	IU Samples	TTO Cert	Violations	SNC	Enforcement Actions	Comments

CHAPTER VII

SUMMARY OF PUBLIC PARTICIPATION ACTIVITIES

In compliance with 40 CFR 403.8(f)(2)(vii), the TSP-SC publishes the names of Industrial Users which were found to be in Significant Non-Compliance with applicable Pretreatment Standards and Requirements. During 2013 we published a list of three (3) companies who were found to be in Significant Non-Compliance.

ARCTURUS MANUFACTURING CORP

CITY OF
OXNARD
CALIFORNIA

**Public Notice of Significant Industrial
Pollution Violation(s)**

As stipulated in chapter 40 of the Code of Federal Regulations (40 CFR), Section 403.8 (f) (2) (viii) of the General Pretreatment Regulations, the City of Oxnard is required to comply with the public participation requirements of 40 CFR Part 25 in the enforcement of national pretreatment standards. These procedures shall include provision for at least annual public notification, in the largest daily newspaper published in the municipality in which the Public Owned Treatment Works (POTW) is located, of industrial users which, at any time during the previous twelve months, were in significant noncompliance with applicable pretreatment requirements. As stipulated, the following companies have significantly violated applicable pretreatment standards or requirements during the period January 2013 to December 31, 2013. The Technical Services Program - Source Control staff have identified your company as being in violation of its discharge limitations as described in 403.8 (f) (2) (viii) (A) and (B) listed below:

(A) Chronic violations of wastewater Discharge limit, defined here as those in which 66 percent or more of all the measurements taken for the same pollutant parameter during a 6-month period exceed (by any magnitude) a numeric Pretreatment Standard or Requirement, including instantaneous limits, as defined by 40 CFR 403.3(1).

(B) Technical Review Criteria (TRC) violations, defined here as those in which 33 percent or more of all of the measurements taken for the same pollutant parameter during a 6-month period equal or exceed the product of the numeric Pretreatment Standard or Requirement including instantaneous limits, as defined by 40 CFR 403.3(1) multiplied by the applicant TRC (TRC=1.4 for BOD, TSS, fats, oil and grease, and 1.2 for all other pollutants except pH).

CHAPTER VIII

SUMMARY OF SLUDGE DISPOSAL CHANGES

All biosolids for 2013 were hauled to Toland Landfill, and properly disposed

CHAPTER IX

SUMMARY OF OTHER PROGRAM EFFORTS

Due to the topography of the City of Oxnard, collection system capacity and collection system maintenance have been the focus for other source control efforts. TSP - SC continues with a permitting program in place for food service establishments and automotive facilities, and also permits the discharge of temporary groundwater pumping projects to the collection system. These programs have aided in a reduction of the number of sanitary sewer overflows experienced in 2013. Information on the food service establishments and automotive facilities follows.

Additionally, as a result of the Technical Services Program – Source Control compliance and enforcement activities during 2013, the Treatment Plant continues to realize an overall reduction in the mass emission (i.e., pounds per day) of priority pollutant metals discharged to its receiving waters and incorporated into the Plant's sludge during the past seven (7) years (see below). It should be noted that seven (7) of the thirteen (13) priority pollutant metals (i.e., antimony, beryllium, chromium, lead, mercury, selenium and silver) are usually not found at or above the analytical detection limits.
